Dear Harold, 6/1/92

For what its worth, I sent the following letter to the New York Times this morning. I have looked at the AMA interview. It is simply unbelievable that Dr. Lundberg describes himself as a "stickler for detail" and ~~he~~ all he lets Humes and Boswell do is lie, misrepresent, and ignore crucial evidence. The companion piece with some of the Dallas doctors seems to be aimed mainly at Crenshaw's book.

Hope you are well, and you have had some success correcting your sleep problem. My regards to Lillian.

Yours,
Jerry.
